

2008

Completed projects

Olangolah Reservoir Embankment and Spillway Upgrade, Forrest, VIC.

Works Included

- Clearing silt from bottom of dam.
- Rock beaching dam wall.
- Dam wall upgrade with filter systems.
- Substantial wall strengthening.
- Spillway upgrades.
- Extensive concrete works.

Site Issues

- Extreme weather conditions.
- Remote location.
- Site access.

Progress on the Olangolah Project was made difficult due to excessive rain in Forrest over the past months. In order to fulfil the Practical Completion requirements, machinery was brought in from Queensland and work was continued during these adverse conditions. Practical Completion was achieved within the allotted time frame.
